

# BROKEN GLASS VIALS CONTAINING DROSOPHILA

Cracked or damaged glass vials containing drosophila should be frozen at  $-20^{\circ}\text{C}$  for 24 hours to euthanize flies.

**Discard vials in a sealable plastic container** for eventual disposal in an RMW cardboard box.

An empty clean mayo, milk, or similar plastic jug maybe used.

Do not autoclave or dispose of glass vials containing flies/eggs in regular trash, broken glass box, or RMW bag.
