

MOT Disclosure Form for Use of Personal Vehicle

I, _____, have been trained in the proper procedures for packaging and transporting biological materials of a Category B or lesser degree of classification via ground transport. Some of these biological materials may contain chemical preservatives.

I *understand* that by agreeing to use my personal automobile to accomplish these tasks I understand that my personal auto liability policy may not provide coverage for the consequences of a biological / chemical material spill and any resulting damage or clean-up costs. Although this possibility is remote, I acknowledge this risk.

Further, I understand that by agreeing to transport such materials I do it as a volunteer, and cannot be compelled to do so by my department or any other employee, and that I cannot be subject to any adverse employment action if I refuse to do so at any time.
